

The Missing Day...Nothing is impossible with GOD!

Several years ago two scientists, Professor Charles A. Totten of Yale University and Sir Edwin Ball, British astronomer, discovered that a day has been lost out of solar time. On July 8, 1970, Harold E Hill, Curtis Engine consultant to the US space program, reported that computer scientists at Green Belt, Maryland, found a day missing in space in total elapsed time.

Hmmmmm, wonder if that has anything to do with the time in the fifteenth century BC when the sun “stood Still,” make the day long enough for Joshua to finish a battle. See Joshua 10:13. Seven centuries later the sundial’s shadow retreated 10 degrees- which is 40 minutes for Judean King Hezekiah. See II Kings 20:11.

Sometimes you may think that you have an impossible situation, or have a God that can’t help you. If HE can stop the days- he can do ANYTHING for you!!

Nothing is impossible with God!
